MHRA Referencing Style – Basic guidelines

Copies of the full MHRA Style Guide are available in the University Library or online at: http://www.mhra.org.uk/Publications/Books/StyleGuide/download.shtml.

Examples are given below for guidance.

General Notes

- **Authors and editors.** For any item you are citing only give the names of up to 3 authors or editors in full. For works by more than 3 authors or editors the name of only the first should be given, followed by *and others*.

- **First author.** The name of the first author should be inverted in references within your bibliography (that is surname first), but not in references appearing in your footnotes.

- **First footnote.** The first time that you make reference to an item within your footnotes, you should use the same format as that used for the reference to the item in your bibliography, except that you should not invert the name of the first author and you should include specific page references.

- **Later footnotes.** These should be abbreviated to the shortest intelligible form (see the examples below).

- **Page numbers.** Where page numbers are given the abbreviations *p.* for one page and *pp.* for a range are used. However, when a volume number either immediately or closely precedes the page numbers, the abbreviation can be omitted and just the pages themselves given.

- **Editors and editions.** Use the abbreviation *ed.* or *eds*, and to denote editions, *edn*.

- **Full point.** Use a full point (or full stop) at the end of a reference in a footnote, but not after each item in your bibliography. Use a full point after abbreviated forms of words, except where the last letter is the same as the last letter of the full word (including *s*).

Books

References are listed in the bibliography in alphabetical order by author or editor surname. The format for references to books in a bibliography is:

**Author surname, Author first name(s)** (for first author), **Author first name(s) Author surname** (for other authors), **Title: Subtitle, Series/Edition/Volume** if relevant (**Place of publication: Publisher name, Year of publication**)
Examples - bibliography:

This example is of a whole book reproduced within a microfilm set. Both the title of the book and of the microfilm set are in italics.

Whilst authors and editors are listed first in references appearing in the bibliography, where a reference is to the whole of an edited work, the title of the edited work will appear first in the reference within the footnotes.

Examples - footnote:

Examples – later footnote:

Cook and Stevenson, pp. 102-105.

Seymour, p. 12.

**Online Publications**

References to online sources should, as far as possible, follow the style used for printed publications as outlined above. The format for a reference to an online source in a bibliography is as follows:

**Author surname, Author first name(s) (for first author), Author first name(s) Author surname (for other authors), ‘Title of Item’, Title of complete resource, Volume. Part (Year of Publication) <URL or DOI> [Date on which resource consulted]**

Note that if you are citing an article in a journal the URL that you give should be a stable or persistent URL, or a DOI (Digital Object Identifier). Many online collections will make available a stable or persistent URL, if not you can use the Library’s “Find an Article” service at: http://lib.leeds.ac.uk/openuriform?genre=article On entering the details of your article this gives you a link to the full text of your article. Right click on this link and copy the URL into your bibliography.

Example – bibliography:

Note that where you are citing a whole work within another whole work, for example a whole book within the online database Early English Books Online as in the reference below, the work, as well as the work which contains it, are both in italics. The URL for the whole online database is given, rather than an individual URL for the work itself.
